

We recognize the trust you place in us when we deliver to your doorstep, shipping dock or place of business.

FedEx and TNT are playing a crucial role in keeping necessary goods moving and delivering critical relief during the COVID-19 crisis. We are still delivering under state of emergency, lockdown and shelter in place restrictions issued in various parts of the world, as government restrictions allow and in accordance with World Health Organization (WHO) guidance.

These restrictions are disrupting the global supply chain. Cargo capacity is limited, and we've had to make adjustments so that our international networks can continue to deliver much-needed goods and services in this constrained environment.

"Safety Above All" is something we take incredibly seriously at FedEx, to help protect our customers and our team members.

We are adhering to all regulations and guidelines from government authorities related to containment of the virus. These regulations and guidelines may affect shipments to and from impacted areas, as well as shipments moving within those areas. Accordingly, we have adjusted our delivery commitments for certain impacted areas. **We are using our global logistics network to minimize service impacts so we can continue to deliver the best possible service to our customers.**

We will continue to update service information daily providing up to date information on impacted transit times and shipping services. To learn more about what FedEx is doing during the COVID-19 crisis click [here](#).

Temporary changes to operations in Europe

The COVID-19 outbreak remains a fluid situation. Our top priority is the safety and well-being of all our team members, customers and suppliers. FedEx operates a hub and spoke network and uses a combination of air and ground transportation modes to move customers' shipments. We operate three major air network gateways in Europe which are located in Cologne, Liege, and Paris, these gateways connect to further regional flight points across Europe. This, in addition to our pan-European road network allows us to continuously optimize the flow of shipments into, out of and across Europe.

Effective March 30th, 2020, we have made some adjustments to our normal flight patterns in order to:

- Ensure we continue to provide the safest possible conditions for all our employees and vendors ;
- Prioritize and enable the flow of all shipments, including priority flows for personal protective equipment (PPE) and medical supplies ;
- Maintain intercontinental connectivity with the rest of world.

As a result, the service expectation for intra-Europe FedEx Express Priority is 2 days but can go up to 3 days depending on the origin / destination of the shipment. There will be no changes to the Intercontinental air network, however customers may see delays as a consequence of the intra-European network changes.

Thank you for your understanding as we work to deliver the best possible service in this time of crisis.

Temporary service suspensions globally

Europe

COVID-19 urgent medical shipments to/from suspended zip codes may still be arranged via Special Services for shipments with origin in Europe, but only if exceptions for urgent medical shipments are allowed to / from these areas. Please note:

- It is not possible for Special Services to enter completely blocked areas,
- Delays may occur depending on the local situation,
- Special Services must comply with all rules on restricted / prohibited items as normal.

Update on the temporary suspension of FedEx Express services in India

Effective March 30th, 2020, FedEx Express will operate services to select postal codes across key cities in India.

Where possible, FedEx Express will prioritize and support pick-up, clearance, and delivery of essential, critical, COVID-19 related items and pharmaceutical shipments (testing kits, medicines, medical devices and bulk drugs/intermediaries) for both international and domestic services as allowed by the Government of India and local authorities.

Please ensure the integrity of your temperature sensitive shipment at origin owing to extended transit times and clearance delays at destination.

We continue to closely monitor the situation and make adjustments to our operations to ensure the health and safety of our customers and team members.

India key service updates for March 29th, 2020 are highlighted as follows:

- **India Outbound services**

FedEx Express continues to operate international scheduled cargo flights from the three FedEx Express gateways in India - Mumbai, Delhi and Bengaluru. FedEx Express will move shipments that are customs cleared and dropped off at the three gateways by your Customs Handling Agent (CHA).

- **India Inbound services**

For high value (greater than USD 1,500) cargo import shipments arriving into India, please use Broker Select Option (BSO). FedEx Express will issue a Delivery Order (DO) to your broker and it is the responsibility of the broker to customs clear at the three FedEx Express gateways (Mumbai, Delhi and Bengaluru) and deliver the shipment.

FedEx Express continues to clear low value (less than USD 1,500) courier import shipments to India. Due to current restrictions, door to door delivery service is suspended. The consignee will be responsible for scheduling a time to collect the shipment from select FedEx Express locations by calling FedEx Express international customer care.

- **Domestic services within India**

FedEx Express will support pick-up and delivery of essential and critical shipments as per Government of India and local authority directives.

Service restrictions globally

Europe restrictions

Origins	Destination	Affected services	Affected shipments	Effective period
Worldwide	Turkey	TNT Economy Services: Dangerous Goods shipments encoded with option codes HZ, LQ, DI, EQ	Service suspension	Until further notice
Turkey	Worldwide	TNT Economy Services: Dangerous Goods shipments encoded with option codes HZ, LQ, DI, EQ	Service suspension	Until further notice

Additional information on Europe restrictions

- The European Union has introduced temporary restrictions for the export of certain personal protective equipment (PPE) outside of the EU countries. The items listed below cannot be exported without a permit issued by the national authorities:
 - Protective spectacles and visors,
 - Face shields,
 - Mouth-nose-protection equipment,
 - Protective garments,
 - Protective gloves,
- Import into the EU of PPE, medicines and medical devices are also subject to new temporary restrictions, which vary per countries and will mainly depend on the quantities being imported and who the importer is (e.g., commercial import of masks, diagnostic kits or others, versus private individual imports of masks in small quantities). The usual requirement of the European Community marking remains in place overall, and non-adherence could mean shipments are blocked upon arrival.

- All shipments must be fit to travel and properly packed in accordance with business as usual requirements.

Additional information for clarification on APAC restrictions

- Weight limitations do not include relief shipments,
- Restrictions are applicable for all cities in China,
- Weight refers to actual weight and volumetric weight (whichever is higher than 100 kg),
- Even if you bring a weight restricted shipment to a FedEx Express / TNT location, it cannot be shipped.
